

Quizgator

Description : The quizgator is an exciting quiz app with daily fresh quiz updates. The updates include general knowledge questions as well current affairs and much more in it!

This quiz app aims to the person who eager to get knowledge and improve it!

For developer :

Stage 1 : Research on how quiz works on digital platform, and make a rough prototype of quizgator.

Prototyping should be done in Adobe XD!

Stage 2: Refine your prototype and prepare the technology stack!
your technology stack should include the technologies required for front-end design , back end development , server, database.

Stage 3: Prepare the database with proper user access, test it for any vulnerabilities. Prepare the design for android app as well website!

Stage 4: Implement the database in android app as well website!
test the final system for any vulnerabilities.

Stage 5: Launch it!
